ICON KEY

ITEMS COME BLANK FOR PERSONALIZATION. LOOK FOR THESE KEY ICONS THROUGHOUT THE CATALOG DISPLAYING FEATURES OF SPECIFIC MATERIALS:

LASERABLE (LASER ENGRAVING):

Products that have this symbol have been tested and can be safely cut, engraved, and marked with a laser. Suggested laser settings for laserable items can be found on the product page on jplusplus.com under the Downloads tab.

UV-LED PRINTABLE:

Products have been tested and the front/top layer will accept marking and images from a UV-LED printer.

TONER HEAT TRANSFER:

Products have been tested and the front/top layer will accept transfers created with a toner-based heat transfer printer.

SUBLIMATION:

Products have been tested for sublimation and have the necessary polyester coating developed to accept unique sublimatable inks.

VINYL:

Products have been tested and the top/front layer will accept vinyl application.

CERMARK:

Products have been tested for engraving with the use of Cermark marking spray. Typically used on hard surface products such as metals, glass, ceramics, stone, brick, slate and more.

INDOOR USE:

Products are intended for use in indoor applications where UV-stability and weather-ability are not required.
